Summary

Full-stack Software Developer with experience in building and maintaining web, mobile, and e-commerce applications. Strong background in React, JavaScript/TypeScript, Python/Django, PostgreSQL, Docker, and modern front-end frameworks. Experienced in collaborating on cross-functional teams, gathering requirements, participating in code reviews, and delivering high-quality technical solutions in fast-paced startup environments.

Technical Skills

Languages: JavaScript, TypeScript, Python, HTML, CSS/SASS, SQL

Frameworks & Libraries: React, Django, Tailwind CSS

Databases: PostgreSQL

Tools & Platforms: Docker, Git/GitHub/GitLab, REST APIs

Other: WordPress, Xcode (wrapper builds), UI development, QA testing

Experience

SOFTWARE DEVELOPER — CELLAR TECHNOLOGIES

October 11, 2022 – August 19, 2025 | Canada

Worked as a full-stack developer contributing to multiple products including the merchant dashboard, POS system, e-commerce platform, and company website. Responsible for both front-end and back-end development, deployment workflows, and cross-team collaboration in a fast-moving startup environment.

Key Contributions:

- Designed, developed, integrated, tested, and maintained software applications (web, mobile, and e-commerce).
- Built front-end features using React, JavaScript/TypeScript, Tailwind CSS, and contributed to mobile POS wrapper builds in Xcode.
- Developed backend features using Python/Django, PostgreSQL, and REST APIs.
- Participated in daily standups, feature planning meetings, peer code reviews, and collaborative development practices.
- Diagnosed, debugged, and resolved full-stack software issues.
- Conducted QA, wrote and executed test cases, and performed regression testing for product reliability.
- Communicated with stakeholders to gather requirements and clarify feature expectations.
- Assisted in onboarding new customers onto our platforms by modifying and tailoring the applications to fit their unique business needs, resolving customer-specific issues, and ensuring smooth adoption of the system.

- Maintained documentation for new and updated software features.

Projects involved:

- Merchant Dashboard: <https://app.getcellar.co>
- POS System: <https://pos.getcellar.co>
- E-commerce Platform: <https://ecom.getcellar.co>
- WordPress Website: <https://getcellar.co/>

BUSINESS ANALYST / WEBSITE ADMIN — GEE ESS KAY LIFECARE

September 1, 2017 – December 31, 2020 | India

Worked in a dual role involving data analysis, compliance document management, and website development/administration.

Key Contributions:

- Led data analysis, marketing analysis, and competitive research activities.
- Audited and submitted regulatory compliance documents to government authorities.
- Developed and administered the company's WordPress website, ensuring content accuracy, security updates, and ongoing maintenance.
